GitHub: github.com/tarunpragada09

Email: tarunpragada09@gmail.com
Mobile: +91 8688829423

SKILLS SUMMARY

Languages:	C, C++, Java, Python, JavaScript
Frameworks & Libraries:	React.js, Node.js, Express.js, NumPy, Pandas, Matplotlib
Databases:	MySQL, Firebase Firestore
Cloud / DevOps:	Vercel, Git, GitHub, Cloudflare
Developer Tools:	VS Code, Postman, Git, GitHub
Core Subjects:	Data Structures & Algorithms, Object-Oriented Programming, Operating Systems
Soft Skills:	Problem Solving, Teamwork, Communication, Adaptability

PROJECTS

Spam Mail Detection Using Machine Learning & NLP | [GitHub](#) | [Live](#)

Jun 2026 – Jul 2026

- Developed a machine-learning solution to classify email messages as Spam or Ham, addressing the problem of unwanted and potentially deceptive messages.
- Implemented TF-IDF vectorization and a Multinomial Naive Bayes classifier to convert email text into numerical features and perform automated classification.
- Built an interactive Streamlit web application that displays the predicted Spam/Ham result along with the corresponding spam probability for user-entered emails.

Tech Stack: Python, Machine Learning, NLP, Scikit-learn, Pandas, NumPy, Streamlit

EV Stock Market Data Analysis using Python | [GitHub](#) | [Live](#)

May 2026 – Jun 2026

- Collected, optimized, and preprocessed real-world EV/technology sector stock-market data using Pandas and NumPy, followed by Exploratory Data Analysis (EDA) and statistical analysis.
- Performed correlation and outlier analysis using summary statistics, variance, t-test, and z-score techniques to identify relationships, distributions, and variability in stock prices.
- Built visualizations and applied linear regression using Matplotlib and Seaborn to identify market trends.

Tech Stack: Python, Pandas, NumPy, Matplotlib, Seaborn, Statistics, Data Visualization

TRAINING

Agentic AI-Based SRE Performance Monitoring & Automated Remediation | [LPU](#)

Jun 2026 – Jul 2026

- Developed an automated SRE workflow using n8n to capture execution timestamps, monitor workflow latency, and maintain persistent performance logs.
- Implemented JavaScript timing and checkpoint tracking to detect bottlenecks and measure execution performance.

Tech Stack: n8n, Agentic AI, Google Gemini, JavaScript, Node.js, Docker, WSL, Workflow Automation, SRE, Performance Monitoring

CERTIFICATIONS / CERTIFICATES

Oracle Data Platform 2025 Certified Foundations Associate LPU	Aug 2026
CodeClash – Coding Competition CodeClash	Aug 2026
Programming Using C++ Infosys	May 2025
Cyber Security & Ethical Hacking – Hands-on Workshop SECUNEUS	Nov 2025

EXTRACURRICULAR ACTIVITIES

- Participated in Prompt-Builder 2026, an AI-based 6-hour hackathon conducted under Astitva, collaborating on problem-solving and developing a technology-driven solution.
- Participated in Bharatiya Antariksh Hackathon 2026, organized by ISRO, working on a space-sector problem statement and developing a technology-driven solution.

EDUCATION

Lovely Professional University	Phagwara, Punjab
Bachelor of Technology — Computer Science and Engineering CGPA: 7.02	Since Aug 2024
Tirumala Junior College	Rajahmundry, Andhra Pradesh
Intermediate — MPC; Percentage: 95.4	Apr 2022 – Mar 2024
ZP High School	Visakhapatnam, Andhra Pradesh
Matriculation; Percentage: 70.8	Apr 2021 – May 2022
